Calendarium Astrologicum:

OR AN

ALMANACK

FOR

the Year of our Lord, 1666.

CONTAINING,

The State of the Year, Eclipses of the
Luminaries, High-water, Terms,
and their Returnes, Luna-
tions, Weather, &c.

With many other things of eminent
Note and Signification.

Unto which

A Description of the most eminent Roads in
England, from Town to Town, and the certain time
of any Mart or Fair, happening in any of them.

BY

THOMAS TRIOPP, Gent.

Student in Physick and Astrologic.

Astra regunt Homines, sed regit Astra Deus.

LONDON, Printed by A. Maxwell, for the
Company of Stationers, 1666.

A Chronology of things Memorable.

T he Creation of the World	5686
Noah's Flood	3960

18	2	3	4	5	Mar. 30	Mar. 31	1
19	23	24	18	19	Apr. 30	Apr. 31	23

By this Table it appears, that Easter hath its limits between March 23, and April 25; It never falling higher then the last, nor lower then the first.

When the Golden Numb. is 8, and the Dominical letter C. Easter day falleth on April the 25 being *St. Mark's day*, and its furthest limit. — And when the Golden Numb. is 5, 13, or 16. and the Dominical letter G. then Easter falleth on the 25 of March being *Lady day*; whence the vulgar saying — The Lord falls in the Ladyes lap. And when the Golden Numb. is 16 and the Dominical letter D. Easter falleth on March 22 its nearest limit, and the lowest it can possibly fall. *Et sic de ceteris*. And so you have the use of the Table.

✿ A Discourse of the three late Comets that were visible to all Europe last year; and what they portend to these nations. Written by J. Gadbury, and sold by L. Chapman, in Exchange Alley near the Royal Exchange, London.

TRIGGE. 1666.

An

An Astrologo-Physical Discourse.

THat the predominion of humours, is the immediate cause of diseases, and that the excitation of those humours is caused by the various and different Aspects and Positions of the Stars, is even by *Hippocrates* and *Galen* themselves confirmed. Trust we then to these Rules Astrological to be observed for advantage of the sick.

Let the	{	Sanguine Choleick Phlegmarick Melancholy	}	bleed the being in	}	♄, or ♀. ♅, or ♄. ♆, or ♁. ♁, ♁, or ♄.
---------	---	---	---	-----------------------	---	---

But let her be also in aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Eleſtuaries, when the ☽ is in ♅; with Pills, when she is in ♄; with Potions, when in ♁, being then poſited as before directed.

Vomits are unſafe for all ſorts of Complexions and Conſtitutions; yet ſometimes there is a neceſſity for them. As when the Diſtemper lieth above the ſtomack; it being impoſſible for a Purge, or any purgative Medicine thence to carry it: but when there is an occaſion, they may be ſafeſt taken when the ☽ is in ♄, ♁, or ♆, in any good aſpect of ♃, ♅, or ☉.

Clifters are moſt conveniently adminiſtred when the ☽ is in ♄, ♅, or ♁, poſited as before.

Good to ſtop Fluxes, or Rheumes, or Iſſues, when the ☽ is in any of the earthly ſignes, viz. ♄, ♁, or ♁; of which experience is a valuable witneſs.

Very proper to bathe when the ☽ is in ♅, ♁, ♁, or ♄, in aſpect of ♅ or ♄.

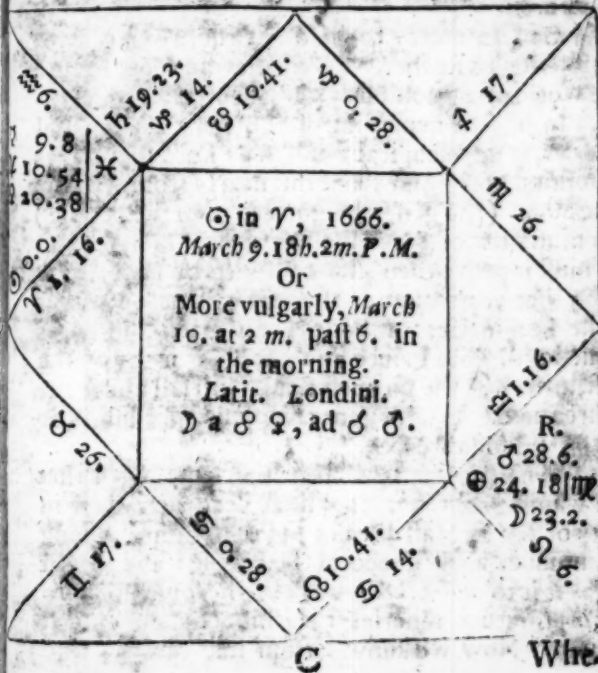

Convenient to cut hair the ☽ being in ♁, ♆, ♁, or ♄, increaſing in light. And although this be in the opinion of many but a trivial thing to obſerve, yet were it more taken notice of by the Gallants of our times, they need not diſguiſe themſelves with *Venus* locks. But they it may be eſteem it an honour to be made amends with a part of her that originally injured them.

TRIGGE. 1666.

Description of the Four Seasons of the Year.

1. Of the Spring.

THE Spring Quarter is called the *Vernal Equinox*, and derives its name à *virendo*, from flourishing: *Quia tunc omnio florent*, & *verent*, because then all things flourish and are green. It begins when the Sun enters the first cruple of the Celestial Ram, which this year falls out on *March 9. 18 h. 2m. P.M.* The Figure of Heaven set to that time, by the Astronomical Tables in the *Doctrin of Nativities*, is as follows.

TRIGGE. 1666.

Whether there be any truth in Astrologie, I refer to my last years Observations in the moneth of April and June. In the first, I predicted the War with Holland, at which time it was proclaimed, and the Reasons shewn wherefore the King of Great Britain undertook to oppose that Nation in their unjust and ravenous proceedings against his subjects. In the latter, I plainly foretold the Plague in words at length, thus: *I very much fear a sickly season in earnest; from which evil God of his mercy protect this great and populous City, London; for ♀ possesseth II, the Ascendant thereof, &c.* And behold! in that very moneth the Pestilence began to rage; the first week in June there died 43. the second week 112. the third week 168. and the fourth 267. and afterwards it increased to that vast number the General Bill expresseth.

I pray God in mercy to hold his destroying hand from afflicting us further: for the Revolutions Figure of the world is a most sickly and inauspicious one indeed! In it, the beginning of the fiery Equinoctial signe *Aries*, is Horoscopical; and *Mars* Lord thereof, is in Opposition of the Sun; and this nearly from Angles; and the Moon (the general Significatrix of the people) is in Conjunction of ♀ in the sixth house. Most sad and heavy must it prove then, unto all sorts of men, &c. when in that years Figure, the angry Planet ♀ afflicts both the Luminaries: it bodes great griefs, sorrows and afflictions, unto Prince and People; many of the highest, as well as the meanest Rank, will fall under the fury threatned. From a general popular prejudice, no species of persons are free.

This Vernal Figure is almost the same with that which was in Anno 1637. in which year there died in the City of London of all diseases 14270 Persons; among which number, almost 4000 of the Plague: and in that year (as it is to be feared) was laid the foundation to all Englands future miseries that immediately ensued thereupon. Now we know, from like causes, like effects

TRIGGE. 1666.

effects proceed; and truly I see not but this year is likely to prove (in every respect) as eminently (if not more) pestilential, then did that. *Deus avertat*, which God of his mercy avert.

We have had of late years Configurations Celestial, more considerably eminent then many Ages formerly have had. I fear me therefore, that our times are likely to prove more rugged then many of them have done. For we have had a great Conjunction of Υ and Ψ in Φ , Anno 1663 in Opposition to the Ascendent of London, yea, such a Conjunction that will happen but once in 800 years; the effects therefore must needs be remarkably prodigious unto us, that are under its Lash. And the last year we had (to add unto these) three Comets or Blazing Stars of terrible signification (beyond all question) to Europe; chiefly unto these Northern Countries wherein we live. All which laid together, will prove this year (in its effects) more then a common year.

Guido Binnius absolutely concludes, that—*Omnes Cometes significant Bella, Terrores, & magnos eventus in mundo*: All Comets whensoever they appear, do signifie Wars and Terrors, and very great events in the world. And it is but rational to believe, that when the Heavens begin to entertain such new and rare Guests, as these three Comets or Blazing Stars were, then the earth must know, that there is something more then ordinary thereby intended for to happen unto, or befall both her and her children. Nature seldom goes a progress or pilgrimage for nothing! She will (as the Sovereigness of all terrestrial beings) command a tribute where-ever she either in person or by proxie visits. Our sins being great, great must be our Atone-ments, or else the Rod will not be removed from us. I could wish my self mistaken in every line I write, upon condition that these Nations might escape the dreadful fury, and the many vials of wrath, threatned to be poured upon them, by the apparition of these Celestial Monitors, the Comets.

TRIGGE. 1666.

Not that I believe this year (so much and so vainly talked of by many Astrologers) will be more remarkably mischievous in its effects, then was the last; nor yet all out so great! Or that the Comets or Blazing Stars alone, presage such great and to be lamented evils, as the Nations of *Europe* are threatned withal! No; there are several years of sorrow and misery, necessity and want, that are steeling upon us, as an armed man, or like a Thief in the night. The envious Planer *Saturn*, (the Author of Cold and Destruction; Enemy of Nature, and all natural existencies) is almosten of the Vernal Figure, and he in his greatest Essential Dignities, and there will be, continuing to do mischief unto mankind, many years. God grant poor heartieles *England* be not too long a patient under the black and *Saturnine* evils we are but newly (as it were) entred into, and that (her great Metropolis) *London*, in stead of *Rome* in *Italy*, suffer not the ruine and perdition threatned.

Never did people run so fast, and in such great numbers and clusters, from the Pestilence, as they do now in these times! as if their flying could protect and preserve them from Gods anger, by this odious disease portended unto them. Gods Judgements are Omnipresent, like Him: if so, then they that flee the farthest off, do but run (with violence and haste) to meet the thing they fear. For his Arrows can (and by wofull experience are found to) kill, as well, and as surely in the Country, as City: there is no place privileged from his eye or anger. Heavens Writ or Summons must be obeyed by all, in all places!

I might be larger in my Judgements on this Vernal Figure, and upon the three Comets; but being confined unto this narrow compass or scantling, I must beg the Readers pardon, that I omit many more things that might be noted unto him from them; as the time and place of Wars and Sicknes, who are like to suffer by Famine, and what places are most likely to be calm and quiet. All which, *Thrasylus*-like, I could inform you of,

TRIGGE. 1666.

of, had I but room ; but wanting that , must request you to be contented with these few general Judgments. And so I shall conclude my discourse of the Vernal Ingress (we being under the effects of Comets) with *Dubautus* (fol. 14.) his opinion of Blazing Stars.

Blazing Stars,

*Th' eaten the World with Famine, Plague and Wars ;
To Princes, Death ; to Kingdomes, many Crosses ;
To all Estates, inevitable Losses !
To Heardsmen, Rot ; to Plowmen, hapless Seasons ;
To Saylor, Storms ; to Cities, Civil Treasons.*

Of the several Eclipses of the Luminaries happening this Year 1666.

Four times will the Luminaries of Heaven be eclipsed from our sight this year . twice the Sun , and as often the Moon. Of which onely the first of the Sun will be conspicuous to us in *England*.

The first defect or Eclipse, will be of the Moon this year, upon *Wednesday, June 6. 7 h. 25 m.* afternoon ; at which time the Sun (with us at *London*) will be near three Quarters of an hour high, and the Moon will be nearly as much under the Horison, or Eastern Finitor : so that this Lunar *D. liquium* cannot be seen of us, but unto such as live more Eastward then we, it will be visible and apparent. As in the Kingdomes of *Muscovia, Tartaria, China, India, &c.* The end of this Eclipse may by the industrious Mathematician and Astronomer be observed in *Italy, Germany, Poland, Hungary, Westphalia*, and the adjacent parts ; but not in *England*.

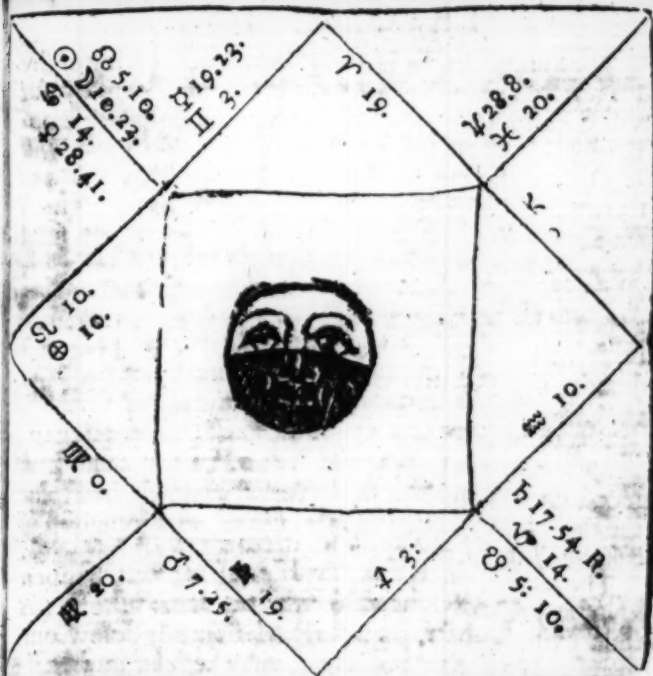

The second will be a great Eclipse of the Sun , upon *Friday, June 22.* about half an hour past 6 in the morning. The Sun will be eclipsed in ten degrees of the Celestial Signe ♊ , the house of the Moon, and the Exaltation

TRIGGE. 1666.

altation of the illustrious Planer *Jupiter*. More mischief to *Scotland* and *Holland* is hereby threatned, and all places that border upon the waters, or that lie low. Damage it denotes unto all Seamen, to Merchants and Merchandize, and to all Maritime affairs. It denotes according to *Proclus*, — *The drying up of Rivers and Fountains in many places, and that there shall be practised among men and women much incontinency, whence diseases, and many other unhappineses proceed.* The ranting Principles by this Eclipse (unless by the prudent Magistrate timely prevented) may now come into request, and be set on foot again; which maintain'd community of wives or women, and preferred a promiscuous Venerie before the holy Ordinance of marriage. It bodes also much knavery, circumvention, and cozenage of every kind to be practised in the world, to the ruine and destruction of many men and Families. Trapping (as it is worded now very commonly) will be in great request, and Knavery be in greater esteem (with very many men) then Justice and honesty.

Behold the type and Figure of the Eclipse!

This

This Eclipse happen in June, on the 2 day, at 18 h. 15 m. in the morning: viz. at a time when the harvest begins to be fairly forward, and seems to revive the almost dying hopes of the industrious Country-man; whose pains hath been great in Tilling and Sowing his ground. The learned Hieronimus Cardanus tells us, and am affraid too too prophetically, — *Eclipsium Solis bellum potentes sunt, unde sine florentem messem inciderint sterilitatem afferunt.* The Eclipses of the Sun are very powerful and forcible in their operations and effects; which happening in the beginning of a flourishing and hopeful harvest, declares sterility and barrenness. The Sun happens now to be so eclipsed; and by this Aphorism, what can we expect but a scarcity of Grain, and of all things useful for the body of mankind that groweth upon the earth? God grant it be not the *Prodromus*, or fore-runner of a Famine. The

The Sun we know is *Rex Planetarum*, the King of the Planets, and gives strength and verue unto them all; but when his light is hindred, his benign influence is obstructed, and Nature it self receives impediment and hindrance thereby in all its operations. Our years of sorrow and scarcity are approaching us; nay, I am afraid we are entred them; and if God in mercy send not a *Jeseph* to provide for us in these Northern Countries especially, or else give us so much prudence as to be taking care against them, and pray for deliverance therefrom, these Nations, I say, may be in as sad and deplorable a condition for want, as once it happened unto poor *Israel*, of which we read in *Genesis*.

The third is a Lunar defect, or Eclipse, and will happen upon *Decem. 1.* near 3 after noon; but it cannot be seen of us, because the Moon at that time will be under the earth: howbeit, it will be visible in the Kingdom of *Bengala*, *Japonia*, the *Phillipine*, and *Molluca* Islands, &c.

The last Eclipse will be of ☉, and that will happen upon *Dec. 15.* about our 6 at night, at what time ☉ (as to us) will be *sub terra*, and above 2 hours below our Western Horizon. This defect may be seen in *Mytel-linica*, and in other Southern and South-Western parts unknown to us. It is observable, that as the two former Eclipses this year, happened in one moneth, viz. *June*, so do these two latter happen in one moneth likewise, viz. in *December*. And it is the opinion of *Hermes*, (and with his opinion I will now conclude) that — *Fiunt in mundo multa incommoda, quando erit in uno mense utriusq. luminaris Eclipsis*, &c. That there will great alterations happen in the world, when in one moneth both Luminaries shall happen to be eclipsed. Thus much for Eclipses at this time, and also for the Judgements of the whole year.

Sapiens Dominabitur Astris!

Finitur die 7,

7 July 22.

1665.

GOD prosper all!

F I N I S.
